

Change Initiative

Environmental Change Postdoctoral Research Position Brown University

A post-doctoral position in the broad area of Environmental Change with an emphasis on Land Cover and Land Use Change (LCLUC) is available at Brown University. We are embarking on a new initiative in Environmental Change and are seeking researchers with interests at the intersections of the natural and social sciences to address compelling scientific and policy issues related to LCLUC. The successful candidate will have the opportunity to work with faculty, researchers, and students from the departments of Geological Sciences, Economics, and Ecology and Evolutionary Biology; the Center for Environmental Studies; and related departments.

Applicants should have a recent Ph.D. degree in that natural or social sciences (e.g. earth science, sociology, economics, ecology), with a demonstrated research record in their discipline. Evidence of interdisciplinary scholarship is welcome. Skills in the development, analysis, and modeling of spatial data are required. Strong communication skills are required. The salary is commensurate with experience. The original appointment is for one year. Extension is possible depending on availability of funding and performance.

For additional information please contact Dr. John Mustard (John.Mustard@brown.edu). Please send a CV and three letters of reference to the above email address or:
